

Cherokee County, Georgia, 1860 Mortality Schedule

Mortality schedules record deaths in the year preceding the taking of the census. For example, the 1860 mortality schedules include persons who died between June 1, 1859 and May 31, 1860. For each person, the following information is listed: name, age, sex, marital status if married or widowed, state or country of birth, month of death, occupation, cause of death, and the length of the final illness.

Federal mortality census schedules were completed by the population census enumerators in 1850-1880. The intent was to register all those dying within the year (July 1 1849 to and including 30 June 1850). The Georgia Schedules have been microfilmed and are part of the National Archives microfilm Series T655, reel 7.

Only name, age, death month, and cause of death are recorded in the table below. However, it would behoove readers to seek out microfilm of the actual census mortality schedule for additional information (sex; color (White, Black, or Mulatto); free or slave; married or widowed; place of birth; profession, occupation, or trade; and number of days ill.

"n.r." indicates that the information was not recorded.

Name	Race	Age	Place of Birth	Month of death	Cause	Year
(Slave) Berry		6		Oct	Croup	1859
(Slave) Bosh		15	Ga.	Nov	Typhoid Fever	1859
